DISCLAIMER

Implementation evidence generated by Oprindo. Not an officially prescribed report format.

Compliance depends on the provider's complete implementation and circumstances.

HASH SEMANTICS

mark.asset_sha256 = SHA-256 of the source bytes submitted for marking

mark.output.asset_sha256 = SHA-256 of the exact final bytes returned to the customer

mark.manifest_id = xmp:iid instance id embedded in the signed output

mark.output.manifest_id = manifest store label of the signed output (matches c2patool)

The C2PA hard binding (c2pa.hash.data) is a third, in-manifest hash - none are equal.
